

E*LDS LDSWeb – Web Based Services

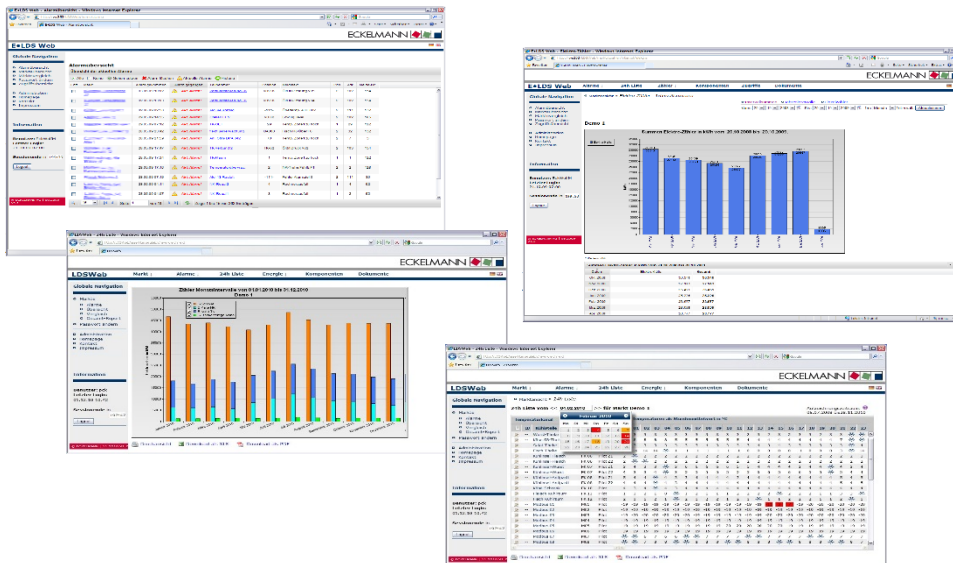

Special functions and features

- LDSWeb is an application for online quality management and optimization of refrigeration- and building management systems
- Remote control of an unlimited number of stores
- System visualization
- Traffic light icons rate critical states
- Energy Management:
 - COP Live-Monitoring
 - Monitoring of energy and consumption data
 - Benchmarking and ranking
 - Energy and economic evaluation
- Quality Management:
 - Automatic HACCP temperature documentation
 - Configurable alarm management
 - Identification of main problems at a glance
 - Reduces workload of your personnel from routine measurement
 - Central quality assurance
- List display for further processing in Excel format
- User-friendly web technology
- Multilingual capability
- Online help

Order numbers

- On request

Other functions and features

- Generates:
 - Total reports
 - Monthly overviews
 - Refrigeration points overview
 - Efficiency benchmarking
 - 24h temperature lists (HACCP)
 - Detailed consumption analytics of e.g. electricity, gas, water
- Intelligent user support by:
 - Automatic benchmarking of temperature deviations and consumptions of cold and energy
 - Clearly structured summaries of important operation parameter
